

A complete range of patented buffer solutions, provides never before achieved pH stability.

Stability - Hamilton guarantees DURACAL pH buffers for 5 years after the date of manufacture. The pH 9.21 and pH 10.01 buffers are even stable in air.

Certificate - All buffers are certified by an external, accredited laboratory.

Traceability - For all buffer a traceability through a unbroken chain (according NIST) is ensured.

Handling - Convenient 250 mL and 500 mL plastic bottle with built-in calibration compartment.
